Scientific Medical College,

OF THE CITY OF NEW YORK,

1 LIVINGSTON PLACE (EAST FIFTEENTH STREET).

Chartered April 22, 1865.

Organized December 19, 1865.

WHOLE NUMBER OF GRADUATES, 587.

WHOLE NUMBER OF MATRICULANTS, 2016.

BOARD OF OFFICERS.

President :

SAMUEL SINCLAIR, Esq.

Vice-President :

HON. CHAUNCEY SHAFFER.

Treasurer :

THOMAS N. ROOKER.

Assistant Treasurer :

G. W. BOSKOWITZ.

Corresponding Secretary :

FREDERICK R. LEE, Esq.

Recording Secretary :

ROBERT S. NEWTON.

Executive Committee :

R. S. NEWTON,

F. R. LEE,

G. W. BOSKOWITZ,

HON. D. S. McELROY,

SAMUEL SINCLAIR.

Board of Censors :

H. G. NEWTON, M. D.,

G. VON LILLIENSCHIOLD, M. D.,

W. G. PRESTON, M. D.,

C. LAREW M. D.,

A. J. KELEMEN, M. D.

Faculty.

ROBERT SAFFORD NEWTON, M. D., L. R. C. S.,
Professor of Surgery.

WILLIAM P. STRICKLAND, D. D., M. D., LL. D.,
Professor of Medical Literature and Forensic Medicine.

GEORGE W. BOSKOWITZ, M. D.,
Professor of Descriptive Anatomy and Surgery.

WILLIAM RICHARDSON, Ph. D.,
Professor of Chemistry and Toxicology.

MAX AUGSBURGER, M. D.,
Professor of Obstetrics and Diseases of Women and Children.

HENRY H. ARMGARDT, M. D.,
Professor of Materia Medica and Therapeutics.

SPENCER H. BROWN, M. D.,
Professor of Physiology and Institutes of Medicine.

BYRON G. CLARK, M. D.,
Professor of Theory and Practice of Medicine.

FREDERICK R. LEE, LL. B.,
Professor of Medical Jurisprudence.

G. M. HARRIS, M. D.,
Lecturer on New Remedies.

ROBERT S. NEWTON, M. D.,
Lecturer on Pathology and Clinical Ophthalmology.

GEORGE W. BOSKOWITZ, M. D.,
Demonstrator of Anatomy.

Board of Trustees.

Z. K. PANGBORN.

ECLECTIC MEDICAL COLLEGE

OF THE

CITY OF NEW YORK.

In this, the twenty-third announcement and catalogue of the Eclectic Medical College of the City of New York, the trustees are gratified in reporting a continuation of the success and advancement which has attended the Institution under their charge.

At no time during the history of the college has it been in so prosperous condition, or so well able to secure to the student the highest advantages of a thorough and complete medical education.

This condition of prosperity is especially gratifying to the Board of Trustees, as presenting indisputable evidence that the course they have pursued with reference to the administration of the affairs of the college has received the sanction of the profession and merited the approval of the friends of the school of Eclectic medicine everywhere.

The most encouraging reports are received from the graduates of the college in all parts of the country, of their success in practice, and their belief in the value of the education received in this school.

The twenty-third session of the Eclectic Medical College of the City of New York will commence at the college building, No. 1 Livingston Place (East Fifteenth street), on Monday, October 1, 1883, continuing five months. The principles and practice of medicine as taught in this college are essentially Eclectic.

The recognition of all that is new, useful and valuable in the study of medical science and the art of curing disease, from whatever source derived, constitutes the basis upon which our system of teaching is founded.

To gather medical knowledge and truth from any and every available source, making a proper selection of the valuable and serviceable from the useless and pernicious and encourage the student to investigation, thought and research in the practical application of this knowledge, will be the earnest and untiring effort of the faculty of the college.

The Board of Trustees take pleasure in stating that all the positions of the faculty are filled, and that they fully believe each chair to be occupied by a Professor amply qualified by education and experience, to impart thorough and accurate instruction in their several departments.

The original purposes of the founders of the Eclectic School of Medicine has practically been accomplished ; as a system, it has received almost universal recognition, and its practitioners are to-day upon the broadest possible platform of equality with the most intelligent, scientific and advanced medical men of all schools.

Its materia medica has gone into use by the most enlightened physicians all over the world, and in most cases the proper credit has been given. What were once distinctively Eclectic remedies are now in universal use and with universal satisfaction.

Than this, as a recognition of the value of the services of the founders of the school, nothing more can be demanded—nothing more need be. We have therefore simply to go forward with our work, intelligently, thoroughly, and faithfully.

In the progress of civilization, types and forms of disease have changed and are continually changing ; in a like adaptation of means to results, the treatment of disease and remedies used therefore will continue to change year by year.

The intelligent medical practitioner does not at the close of his collegiate term abandon his studies. He must be a life-long student if he would keep pace with the marvellous discoveries constantly being made in every department of medical science.

But it is in the college that he receives the ground work—the basis of his education for his future professional career, and it is all important that this should be of the most thorough and complete character.

We believe we are justified in saying that from the experience

of the past—the hundreds of students from this college who are pursuing a useful and honorable professional life—full of value and importance to their fellow men, that our school will maintain its position in the future as in the past, as the best representative of the advanced system of medical culture.

The tendency of all schools of medicine is towards a broad, liberal and free Eclecticism. That is to say, there is in modern medical research a disposition on the part of all enlightened experimentalists to accept and use the best methods and appliances for the relief of suffering humanity, irrespective of its source. A hearty concert of action on the part of all medical practitioners will, it is believed, in the near future result in the consolidation of all systems into one, and the highest and best talent, the most earnest and patient investigators, are slowly but surely preparing the way for this most desirable result.

Already, decided action has been taken on the part of the oldest medical society in this State looking to a sensible, manly rule of ethics—tolerance—and good-fellowship.

The facilities for obtaining a thorough medical education in this, the metropolitan city of the country, are unsurpassed. Large cities are naturally the centres for clinical instruction, but it is only in New York that the student will find the culmination of progressive thought as applied and demonstrated in practical results in all departments of medical science.

The medical profession throughout the country have become fully convinced of the superior educational and clinical advantages which are offered by the numerous hospitals and public charities in this city, and naturally they advise students to enter colleges in which these facilities may be made available.

Our students have free access to the most extensive and well-conducted hospitals, dispensaries and infirmaries to be found in any civilized country; there is full and complete opportunity to investigate the different methods of treatment, to witness the most important and intricate surgical operations and to study every known form of disease. The opportunities for comparison and critical analysis of the different methods and remedies used are not to be found in any other city in the country.

The location of the college building is central, with reference

to these great hospitals, and nearly all of them are conveniently accessible.

There is also connected with the college a dispensary, in which a large number of patients are treated daily; and this, together with the regular clinics held by the members of the faculty, will give the student a thorough knowledge of those subjects which are best elucidated by and require demonstration. The college has suffered an almost irreparable loss by the death of Dr. Robert S. Newton.

Dr. Newton was the founder of the Eclectic Medical College of the City of New York, and to it he devoted the best years of his life; to his untiring efforts in its behalf is due the position and prestige that it has to-day.

For more than seventeen years he had labored in and out of season for its advancement and success. The hundreds of students who have received his instructions and kindly advice—the great number of influential friends and co-laborers whom he drew around him, and his extensive clientage, all remember with gratitude and affection his timely and judicious counsel, his wisely directed administration, and the useful and valuable results which have always characterized him as a successful practitioner and teacher. In his death the medical profession has lost one of its most skillful, active and worthy members, the college its most earnest and devoted advocate and counsellor, and society a truly useful and exemplary citizen.

His name is recorded upon the page of history, and his memory enshrined in the hearts of thousands whose days have been prolonged, and whose skill and talent have been developed under his watchful care.

He has left the college in the hands of those who appreciate his services and the sacrifices he made for it; and one of the great incentives to conscientious duty in teaching the profession of medicine in this school will be the memory of its founder. Though dead he still lives in the hearts of those who remember his unselfish and faithful labors in its behalf.

REQUIREMENTS FOR GRADUATION.

Requisites for Graduation: Twenty-one years of age, three years' study under the supervision of a reputable physician, and

attend two full terms of instruction in an incorporated medical college, the last of which shall be in this college. Every candidate must present a thesis of his own production on some medical subject.

FEES.

The fees for instruction (to be paid in advance) are as follows : Matriculation, \$5 ; for each Full Course of Lectures, \$50 ; Demonstrator's Ticket, \$10 ; Hospital free ; Graduation Fee, \$30 ; Certificate of Scholarship, entitling the holder to keep a student in the college for ten years from the date, \$500 ; Perpetual Scholarship, \$1,000.

TEXT-BOOKS.

Students should be careful to provide themselves with the best text-books, giving the preference, of course, to Eclectic authors.

The following are preferred :

Anatomy—Gray. *Surgery*—Syme, by Newton, Bryant. *Theory and Practice of Medicine*—Newton, Potter. Reynold's Bristowe. *Materia Medica*—Headland, Coe. U. S. DISPENSARY. NATIONAL DISPENSATORY. AMERICAN DISPENSATORY—Biddle, Goss. *Botany*—Wood, Gray. *Chemistry*—Attfield, Bloxham, Lloyds. *Obstetrics*—Tyler Symth, by Gardner Cazaux, King, Leishman. *Diseases of Children*—Newton and Powell. *Physiology*—Kirkes, M. Foster. *Medical Jurisprudence*—Taylor, Beck. *Diseases of Women*—Clark, Thomas. *Medical Chemistry*—Wm. H. Greene, M. D.

Good board may be had convenient to the college from four to six dollars a week. Students arriving in the city should call at the college, No. 1 Livingston Place, where a list of boarding houses can be seen.

All the baggage of the students may be checked direct to the college, where it will be cared for.

Any further information may be obtained by addressing Thomas G. Fay, Clerk Eclectic Medical College, 1 Livingston Place.

HOSPITALS, INFIRMARIES AND DISPENSARIES ACCESSIBLE TO STUDENTS OF THE ECLECTIC MEDICAL COLLEGE.

BELLEVUE HOSPITAL.—This institution is situated on Twenty-sixth street and East River, and is the charity hospital of New York City. It is open to all medical students for clinical study. Its conveniences and accommodations are co-extensive with its purposes. It contains over one thousand beds, and the number of patients annually treated there is from ten to fifteen thousand. Clinical lectures are given, or surgical operations made, daily. *Post mortem* examinations are also held, to which medical students are admitted. A variety of diseases are here presented, affording an excellent opportunity for observation, and to make

the student familiar with the various morbid appearances. The regular operating days in the surgical *clinique* are Wednesdays and Saturdays, at 1:30 o'clock p. m.

EMIGRANT HOSPITAL.—Is the finest and best arranged hospital in the world. The hospital buildings contain accommodations for about two thousand persons. The number of patients treated annually is about eight thousand.

ST. VINCENT'S HOSPITAL—MOUNT SINAI HOSPITAL—ST. LUKE'S HOSPITAL — WOMEN'S HOSPITAL — LYING-IN ASYLUM — BLACKWELL'S ISLAND HOSPITAL.—Are large and important institutions.

EYE AND EAR INFIRMARY.—This institution makes ample and special provision for the study of diseases of the eye and ear. Five thousand cases of disease are exhibited to the students during the year, and special courses of instruction given in the anatomy and physiology of the eye, and the use of the ophthalmoscope established. The operating theatre and the daily clinical lectures are arranged for the convenience of the students, and every facility provided for a thorough knowledge of ophthalmic and aural surgery.

DISPENSARIES.—These charities, which afford a wide field for practical observation, are also without charge. Some idea may be formed of their value, when it is stated that every year there are reported more than eighty thousand patients are being treated by the physicians and surgeons in attendance. In these institutions the diseases are arranged into distinct classes—such as diseases of the head, chest, abdomen, extremities, fevers, eruptive diseases, etc. Over fifty thousand persons have been treated at the Eclectic Medical Dispensary of New York by our own physicians.

In addition to the foregoing clinical advantages, medical and surgical instruction will be imparted by means of *cliniques*, held at the colleges.

The opportunities for practical anatomy are unequalled, the supply of *material* for dissection being ample, and furnished at merely nominal prices. The demonstrator will give the student every needed assistance.

This college has all the advantages possessed by other colleges in New York—the students have the privilege of visiting all the hospitals, and public institutions, and clinics, with as good a staff

of teachers ; the finest dissecting room in New York, and all at such prices as to enable every one seeking medical education to enter the profession.

TO COLLEGE LIBRARIES.

The Librarians of Colleges and other Institutions receiving this Catalogue will please send their own Catalogues in exchange.
